

Removable Hard Disk Enclosure Kit

Uninstall hard disk for relocation to a secure area

Business challenge:

In high-security work environments, printer hard disks are often removed each night to protect sensitive digital information. Hard disk removal and installation must be quick, easy, and reliable.

Lexmark's advantage:

The Lexmark Removable Hard Disk Enclosure Kit provides easy access to the hard disk and connects using a durable USB connector for multiple insertions.

What are the advantages of Lexmark Hard Disk Enclosure Kit?

- Simple design that utilises the existing hard disk installed in the device
- Broad compatibility to Lexmark printers and multifunction products (MFPs) new and old
- Easy installations and removal of the hard disk

Ideal for:

- Local, State and Federal Government
- Banking and Financial Services
- Healthcare
- Any security-conscious user

Features

Easy installation Access

Mounts easily to the side of most Lexmark devices and connects simply with USB.

Comply with security protocols

Allows nightly removal and installations of hard disks. Enables advanced hard disk functions in high- security areas.

Lexmark Hard Disk Monitor Application

The Lexmark Hard Disk Monitor application runs in the background of the device to monitor the status of the hard disk. When the printer is powered on and no hard disk is present this applications displays a message alerting the user to the missing hard disk. An IT administrator can set up to lock down the device if desired.
